

PRESS RELEASE

Sunrise Systems to implement Public Health Portal for New Jersey Health Officers Association (NJHOA)

Metuchen, NJ (September, 2011) – Sunrise Systems, Inc. a leading edge IT Services and Solutions provider will be working with New Jersey Health Officers Association (NJHOA) for the implementation of Public Health Portal.

Public Health Portal will enable Local Health Departments (LHD) across the State of New Jersey to offer online services to general citizens to “Find a Flu Clinic” and make an online appointment for Flu, Pneumonia, and other vaccines. The Portal will also enable LHD to collect and report on Surveillance data for Influenza like illness and GI illness from local schools and other entities.

This project was made possible by grant funding from the New Jersey Department of Health and Senior Services. The initial launch will be serving the following communities:

- County of Somerset (Bedminster, Far Hills, Manville, North Plainfield, Raritan, Rocky Hill, and Somerville)
- City of Hackensack
- Township of Wayne

Major benefits of this Health Information Technology include improving Local Health Department’s preparedness capabilities to address Flu and other health outbreaks through collection of surveillance data, proper planning for staff, inventory management for vaccine and other supplies, effective communication with general public, updates to statewide immunization registry and overall increase staff productivity and improve record keeping. As part of the implementation, Sunrise will assist NJHOA and the Local Health Departments in staff training, and overall adoption of the new system.

“We look forward to working with NJHOA and Local Health Departments on this significant project to provide valuable services to general public and help departments increase staff productivity” said Noorali Sonawalla, President of Sunrise Systems, Inc.
