

EZ Online Citizen Services that are designed to ease application filing and quicken turnaround time

EZ Online Citizen Services is a new offering in our suite of eGovernment products. The system is designed to meet individual department's needs for collecting and storing all the information and data needed to issue licenses and permits, including the ability to store supporting documents. We offer this as a SaaS (Software as a Service) model for easy implementation by municipalities, local and government agencies. Our modular technology solution can be integrated into our Records Information Management (RIM) cloud solutions or existing technology platforms. This solution also provides a clear migration path for government agencies wishing to embrace cloud-based technology benefits while capitalizing on existing technology investments.

Capabilities and Features
